

RICHMOND CITY COUNCIL

MAY 16, 2017

The regular meeting of the Richmond City Council was held at the Richmond City Office Building located at 6 West Main, Richmond, Utah on Tuesday, May 16, 2017. The meeting began at 7:00 P.M.; Mayor Jeffrey Young was in the Chair. The opening remarks were made by Lyle Bair.

The following Council members were in attendance: Tucker Thatcher, Cheryl Peck, Lyle Bair and Kelly Crafts.

Paul Erickson was excused.

City Manager Marlowe Adkins, City Engineer Darek Kimball, City Recorder Justin Lewis and City Treasurer Christine Purser were also in attendance.

APPROVAL OF CITY COUNCIL MEETING MINUTES

A motion to approve the April 18, 2017 City Council meeting minutes was made by Tucker, seconded by Cheryl and the vote was unanimous.

Yes Vote: Thatcher, Peck, Bair, Crafts

No Vote: None

Absent: Erickson

FIRE DEPARTMENT REPORT

CHIEF TROY HOOLEY: I appreciate the help and support of the Mayor, Council and residents on the painting of the fire station. We have received the ambulance from the County. We will have it in the parade. Right now we are working on repairing the lighting inside the building. Some of the lights don't work so we are replacing all of the lighting with LED bulbs/fixtures. We are getting ready for Black & White Days. A barbeque is scheduled for Friday night as we prepare the vehicles for Saturday. The Council and Mayor are invited to attend the barbeque.

MAYOR: Friday night is the movie in the park so we will be down there assisting the Youth Council.

CHERYL: The barbeque is at 7:00 P.M. and the movie at the park does not start until 9:00 P.M.

CHIEF HOOLEY: The new Coca Cola machine has been delivered.

LYLE: Is your department monitoring and filling the machine?

CHIEF HOOLEY: Yes. For last month there were nine calls. Seven were medical and two fire. We were able to staff all of the calls.

CHERYL: Do you still want all of the Fire Department vehicles at the front of the parade in case you have to leave to respond to an emergency?

CHIEF HOOLEY: Yes. We have invited all of the fire fighters that have been on the department in the past to join with us in the parade this year. We have an antique fire truck that will haul them around during the parade.

YOUTH COUNCIL REPORT

MAYOR: The Youth Council is busy doing a test run at the hamburger stand tonight. This is their big fundraiser for the year. They man the hamburger stand all throughout Black & White Days with the kids and their parents and anyone else willing to help.

LIBRARY REPORT

CHERYL: The Library staff has been highlighting some resources available through the State online library system. Lots of flyers have been handed out recently. The Library staff has been working with Park Elementary on a project as well. Baby story time is held twice a month and has about 10 parents and 24 children attending. Right now a free nursery rhyme book is being handed out to those that want it. So far 38 have been handed out. The LSTA grant we received in the past is no longer being funded by the State so we won't receive that grant in the future. Play Unplugged is not happening in the valley this year so the Library will not be participating in that program.

MAYOR: Lora is doing a great job. Lora has filled in well since Juliene retired. During the Mayor's Report I will give an update on our transition to Park School. We are considering relocating the Library down there eventually. Fiber is available at Park School and that is a big bonus for us. We have many options to consider with the buildings we manage. Eventually we will discuss a transition of the Library with Lora, the Library Board and the community.

CONDITIONAL USE PERMIT RENEWAL REQUEST FOR 4-H PIG RAISING AT 510 SOUTH 100 EAST.

MAYOR: We have a request to renew a conditional use permit for some pigs at 510 South 100 East. There were not any registered complaints over the last year. The permit is required to be renewed yearly.

JULIE MATTSO: We have tried to strategically place the pigs at our place to not have issues with our neighbors.

CHERYL: We are thankful you follow the rules.

LYLE: How many pigs?

JULIE: Two. My two children each want to raise a pig for the local 4-H program. The pigs are purchased in April of each year and then sold at the Cache County Fair later in the summer. We need to renew the permit to be able to do this again this year. We would not have more than two pigs.

A motion to approve the conditional use permit request by Stan Mattson to raise two (2) pigs on his property, Parcel Number 09-081-0013, located at 510 South 100 East for the purpose of raising the pigs until the Cache County Fair at the end August or no later than September 30, 2017 was made by Tucker, seconded by Cheryl and the vote was unanimous.

Yes Vote: Thatcher, Peck, Bair, Crafts

No Vote: None

Absent: Erickson

UPDATE ON THE UPCOMING PRIMARY AND GENERAL ELECTION DEADLINES AND DATES.

Justin read the following:

Richmond City will hold its municipal election this fall to elect a Mayor and three (3) Council members.

The Primary Election, if needed, is on Tuesday, August 15, 2017.

The General Election will be held on Tuesday, November 7, 2017.

The Richmond City election is non-partisan.

The Mayor and two (2) Council members will serve four (4) year terms and one (1) Council member will serve a two (2) year term and all are elected at large.

The incumbents are:

Mayor	Jeffrey Young
Council Seat	Cheryl Peck
Council Seat	Lyle Bair
Council Seat	Kelly Crafts

Note: When signing up for a Council member position the applicant must indicate if applying for a four (4) year term or a two (2) year term.

Those interested in filing for one of these offices must:

- Be a United States citizen at the time of filing
- Be a registered voter of Richmond City
- Be at least 18 years old
- Be a resident of Richmond City for at least 365 consecutive days immediately preceding the date of the general election; November 7, 2017

Each person seeking to become a candidate for a municipal office shall file a Declaration of Candidacy in person at the City Office building located at 6 West Main, Richmond, Utah during regular office hours from Thursday, June 1, 2017 through Wednesday, June 7, 2017.

The required filing form is available at the City Office building.

There is not a filing fee.

CHERYL: What happens to require a primary election?

JUSTIN: If three or more residents run for Mayor or if five or more residents run for the two four year Council terms or three or more residents run for the two year Council term. The City will hold a traditional election as the cost of a vote by mail election is not feasible for the City at this time.

MAYOR: Cache County will continue to do a vote by mail election every other year which is when they are in charge. What is the voter turnout when the election is done by mail?

JUSTIN: If I recall correctly the countywide turnout last year was around 86%. We usually average around 18-22% in our local election.

KELLY: Why is one of the seats only for a two year term?

JUSTIN: Because of the resignation of Mayor Michael Hall and Council Member Brad Jensen and the appointment of Council Member Young. When Mayor Young was appointed as Mayor it required his Council seat to be voted on at the next election since he still had two years remaining in his term. The election should be the Mayor and two Council members this year and then in two years it would be three Council members. To get back on this course we are required to have one of the Council seats be for a period of two years.

CHERYL: Which seat is the two year seat?

JUSTIN: Kelly's as she is the Council member that took over Mayor Young's Council seat.

MONTHLY FINANCIAL REVIEW WITH DISCUSSION AND DECISIONS AS NECESSARY.

JUSTIN: So far this budget year we have collected \$105,828 in property tax. Normally we get the majority in December and January and then another smaller distribution in April or so. The Library received a CLEF State Grant in the amount of \$4,500. So far \$2,875 in Black & White Days sponsorship fees have been collected.

MAYOR: We need to review property taxes and consider holding the rate like other cities. Justin explain what I am referring too and how this process works.

JUSTIN: The City requests for example \$107,000 in property tax. When a new home is built the total value of the properties in town goes up so the rate has to go down to keep the \$107,000 which was requested. We need to consider holding the rate each year so as new homes are added it increases the property tax we receive and at the same time does not cost existing property owners more. Lewiston does this on a yearly basis from what I understand. Holding the rate would generate additional revenue from the new homes and keep the same rate for existing residents.

MAYOR: All those new homes coming into town are not adding additional property tax revenue to the City as they are driving down the rate and everyone pays a little bit less on the amount due to Richmond City.

JUSTIN: That is correct. The school district has raised their rate quite a bit the last couple of years so people are paying more overall but less is coming to the City and most people don't know or understand that is happening.

TUCKER: This is something we need to review and discuss in the future.

MAYOR: I agree. We need to come up with a short and long term plan.

MARLOWE: The last property tax increase was in 1978.

LYLE: We are adding a lot more roads with these new subdivisions and they require funds to maintain them as well.

MAYOR: Lewiston has the highest rate in the valley and they hold their rate each year.

JUSTIN: The last time I looked Lewiston City is the second largest City in the state in regards to land mass. I will supply the City a history of property tax received over the last few years.

MAYOR: We need to come up with a plan of how to address this.

JUSTIN: The property tax conversation will start in January 2018 and it requires a lot of noticing and meetings as it is a long process to increase the rate or hold the rate. Holding the rate is the exact same process as increasing the rate. We had a bad month, a couple of months ago, on returned checks. Fortunately we were able to collect on the majority of those last month. The rental house remodel is coming along. The roof has been completed. The electrical, windows and flooring is currently being worked on. When those items are completed the cabinets and counter tops will be installed. Then painting and finish work plumbing will be done. I am hopeful everything is complete in June and we can rent the home in July but it might be August before this happens. Water impact fees collected so far this year total \$70,561. Sewer impact fees collected total \$91,115.

PUBLIC HEARING FOR THE PURPOSE OF MAKING ADJUSTMENTS TO THE BUDGET FOR THE PERIOD OF JULY 1, 2016 THROUGH JUNE 30, 2017 AND DISCUSSING THE NEW BUDGET FOR THE PERIOD OF JULY 1, 2017 THROUGH JUNE 30, 2018.

JUSTIN: I am proposing increasing the general fund revenue and expense \$52,463. Increases to revenues are for donations, the SCBA grant, the Library CLEF grant, sales tax and building permits. Increases in the Administration Fund are for sending a third girl to Girl's State and Office Expense. A decrease was made for engineering. Building Fund expense is decreased because the new roof on the fire station cost less than anticipated and from the reallocation of employee wages earlier in the year when some job titles and responsibilities changed. Public Safety Fund shows a minor increase to benefits. The biggest increase is to the Streets Department Fund. We purchased more salt this year than in the last couple of years combined. We also are allocating some Class "C" Road Funds from last year that were not spent by the end of the budget year.

MAYOR: Do we know the cost savings by using just the blue salt and not a salt and sand combination?

JUSTIN: I don't know.

MARLOWE: I know we saved money as we didn't have to sweep the streets this spring and that saves time and money.

CHERYL: How much salt do we have now?

JUSTIN: The bin is around 15-20% full. The Fire Department Fund is being increased for the SCBA grant and they are purchasing quite a few supplies to get the department fully stocked. The EMT Department Fund is decreasing as we do not need to purchase a defibrillator. The Library Fund is increasing because of the CLEF grant that was received as well as for some computer repairs and updates. The Cub River Sports Fund is increasing as we owe half of the cost of the new golf/utility cart that is being purchased for the complex. The water and sewer funds are enterprise funds so they do not have to balance. Increase to water revenue is for impact fees, connection charges and interest. Increases to water fund expenses are for depreciation and interest expense. Sewer fund revenue increases are for impact fees. Sewer fund expense increases are for engineering and plant operation. J-U-B Engineers was contracted with to operate the MBR plant while the city hired a new wastewater plant operator after the current

operator accepted employment elsewhere. Capital projects fund revenue is being increased for interest earned and a decrease in expense for the amount of funds needing to be transferred to the general fund. The proposed new budget totals \$1,124,444 for the general fund. A new backhoe is included as well as the remodeling project at Park School. The Fire and EMT department budgets have now been combined into one budget starting in the new budget year. Water fund revenue is proposed at \$654,000 and expenses of \$640,303 of which \$201,000 is depreciation expense. Sewer fund revenue is proposed at \$491,500 and expense of \$796,721 of which \$320,000 is depreciation expense. The Cub River Sports Complex Fund includes revenue and expense of \$20,000 as proposed.

A motion to close the regular Council meeting and open the public hearing was made by Tucker, seconded by Lyle and the vote was unanimous.

Yes Vote: Thatcher, Peck, Bair, Crafts

No Vote: None

Absent: Erickson

The public hearing opened at 7:40 P.M.

EZEKIEL SANDERS: Is it possible to use the water from the sewage plant in the irrigation system to save on water costs?

TUCKER: That is something we have been talking with the irrigation company about doing. It might be able to happen. The water is treated at our MBR plant and then it could be reused. It makes sense to try and reuse it. There are some permits the City would need to make this happen and we are working with the city engineer on this project. Hopefully the water could be put into the irrigation water system to use on crops, the City parks or grass at homes. There are many options for the water to be reused. We need to consider making this a priority. Water can be scarce at times and it makes sense to reuse it.

MAYOR: How much sewer water is coming out of the plant daily?

DAREK: This has been a topic of discussion for about six years. We own the water rights to the water coming out of the plant. It would be nice to put the water in the irrigation system at the bottom of town and have them trade us some water at the top of the system.

MAYOR: How many gallons do you estimate a day come out of the plant?

DAREK: Around 250,000 gallons per day. It would be nice to reuse if possible. Mayor Panter filed on the water rights for the water coming out of the plant many years ago. Many people want that water and have asked for it but we have the rights to it.

TUCKER: There is a process to make this happen. Permitting is a big part of the process.

DAREK: We have a permit to discharge into the river and the requirements for this permit would be less stringent. We are required to be permitted for either option. The water can be treated in different ways depending on how it is discharged. The water coming out of the sewer plant is clean enough for human contact. It is better for the water to be reused than dumped into the river. The State of Utah will ultimately decide if we can do this project.

CHERYL: Is the main issue time or money on this project?

DAREK: Mainly time. We are also working on an aquifer storage project as well. That means putting water back into the ground to store in the winter months when we don't need as much

water. Then we would be allowed to use the water in the summer we have stored. We are only allowed so many gallons per minutes based on the water rights we have.

MAYOR: I would like you to dedicate time to get these two projects worked on. Tucker is the City Council member who works with the irrigation board. Let's find out what is required and then have you, Tucker and myself sit down with the irrigation board to discuss. My goal is if we put "x" gallons in below town they need to give the residents the same amount of gallons in town.

TUCKER: I would hope this would help to limit the need for irrigation turns in some cases.

DAREK: Our original intent was to trade ten units on the bottom of the system for ten units at the top of the system. The State of Utah will partner with us on the aquifer storage project.

MAYOR: Aquifer storage is a winter project; correct?

DAREK: Yes.

MAYOR: Would it be possible this coming winter?

DAREK: We can try. I think that is realistic.

MAYOR: I would like to see a timeline for both projects.

DAREK: On a recent Class "C" Road Funds chart I reviewed it showed our road mileage throughout town had not been updated since 2007 or so.

MARLOWE: I update this information on a yearly basis.

MAYOR: Isn't there a report you submit?

MARLOWE: Yes.

DAREK: We need to contact UDOT and see what is going on.

MARLOWE: I submit the report to the County on a yearly basis.

DAREK: The report I reviewed was from UDOT.

MAYOR: We need to compare the report Marlowe has submitted with the UDOT report to make sure they match.

DAREK: We need to make sure all new subdivisions and other roads are added on as they are built and turned over to the City.

A motion to close the public hearing and reopen the regular Council meeting was made by Lyle, seconded by Tucker and the vote was unanimous.

MAYOR: It is interesting to review the graph showing the breakdown of the general fund expenses. Street Expense is 45% of the entire General Fund budget.

JUSTIN: On the revenue side, I attended a training session where they said taxes collected should be about 76% of the total revenue received for the general fund and we are at 52%. Each city is different but this was a number thrown out at a training seminar I attended.

MAYOR: Politicians don't like to deal with taxes on an election year. If the current Council does not review and adjust as needed it just gets pushed to a future Council. When it is pushed off for several years it results in large increases rather than small incremental increases. It is our responsibility to review now and plan for the future as well. I don't want us to put things off to a future Council. It is not convenient to have these types of discussions but it is the right thing to do. We don't want to create unneeded problems for the future.

JUSTIN: This year has been the exception to the rule for us. We purchased a new truck and a newer used truck. We have not purchased any new or used vehicles for several years. We purchased a new riding lawnmower. We try and save funds to avoid having to take out loans and pay interest. The only loans we want to have are those large infrastructure projects where it is not possible to pay for them upon completion. People also think we make substantial revenue from the court system. This is not true. The majority of what we collect is paid to the state and they distribute the funds. We have to pay for police protection, the Judge, Court Clerk, Prosecutor, crossing guards and others from the public safety fund.

MARLOWE: We pay a lot in attorney fees per year. We also pay for a public defender when one is needed.

COUNCIL MEMBER REPORTS

TUCKER: The planning commission has been a little slow lately.

JUSTIN: Was the lot split on approximately 100 East 200 North approved?

MARLOWE: It is a single lot split that the Planning Commission approved and is sending to the Council for consideration at a future meeting.

TUCKER: The rental house remodel is coming along nicely. I met with the irrigation company and they would like to team up with us on our phone system to have their contact information available. There is a water leak on the highway across from Harris Dairyland that needs to be reviewed when the ground dries out more to figure out the source of the leak.

DAREK: I have talked to Terry Spackman about this issue and we both agreed it needs to dry out more before we can determine the exact cause of the leak.

CHERYL: What about the leak across from Terry Spackman's home?

TUCKER: They are aware of the leak on the south side of the road on 300 South 200 West.

CHERYL: As expected we are having a hard time finding a director for the Harvest Market for this year. The Youth Council is very active and has many things going on. They are managing the hamburger stand this week during Black & White Days. There is a need for help at the hamburger stand during the day when the kids are in school.

MAYOR'S REPORT

MAYOR: I recently met with the president of J-U-B Engineers about our relationship with his firm. It was a good meeting. Darek is a good engineer for the City. It is hard for small cities to balance having proper engineering and being able to afford to have it completed. Darek how long have you been working with the City?

DAREK: Around ten years.

MAYOR: It is nice to have the same engineer for ten years. Darek knows all about the City. It is just an added bonus he resides in the City. Darek is very committed to the city. We use J-U-B on all of our projects. They always look out for the City. Their job is to represent the City not the developer. We have had a long term relationship with them. We have a big project coming up as we take ownership of Park School on September 1st. We take over the grounds and the building at that time.

CHERYL: What is going to happen to the Head Start program building?

MAYOR: The school doesn't own the Head Start building but does own the land under the building. I would like to see the Head Start program relocate inside the main building. There are two different rooms we can consider for them to utilize. Long term the portable type buildings will be removed. I would like to pave the area where those buildings are located so the sheriff's office will have some parking as well as parking for patrons of the library.

CHERYL: Will we take over ownership of the portables on September 1st?

MAYOR: That is up to the school district. They will let us know. The portables are older and right now they don't have a place to utilize them.

CHERYL: White Pine Elementary will probably need them in the near future.

MAYOR: I have met with Sheriff Chad Jensen about the Park School building. I have a verbal commitment from the Sheriff's Office to have an agreement put in place for them to have a station out of the Park School building in the future. We will provide them a room in the building with a fiber internet connection and in return they agree to create a hub for the northern end of the valley and station it in the building. Long term the intent would be to have a supervisor and possibly up to ten officers stationed at this location. I met with Sheriff Jensen and a local contractor to review the building and the needs of the Sheriff's Office. The valley is growing and there is a need. Our contract with the Sheriff's Office has benefited the City for many years. We don't even pay enough on a yearly basis to purchase a new patrol car. If we can provide them a facility to be based out of there will be a lot more officer presence in the City. We want them here rather than elsewhere.

CHERYL: Richmond is a central area in the north end of the valley.

MAYOR: We pay the Sheriff's Office around \$23,000 per year. That is low and we have agreed to increase the amount over time. They are willing to work with us. If we invest in the building now we can trade the remodeling cost against the contracted hours in the future. We are looking at letting the Sheriff's Office utilize the west room in the new portion of the building. There would be two parking stalls right by their access door. We need to plan with the Sheriff's Office for the future. The room by the proposed Sheriff's room would be a fire department training room as well as an emergency command center room if needed. It is called an EOC (Emergency Operations Center). The key with the Sheriff's Office is being able to offer them a fiber connection for the rooms they use. They will purchase and pay for their own furnishings such as computers and furniture. We will supply them a room in the building.

CHERYL: The location is good for them as well as it is right by the highway.

MAYOR: Fiber is the biggest factor for the sheriff's office. We get fiber through UEN (Utah Education Network) which is available through our Library. The Library needs to be located at Park School for us to keep this connection. The Carnegie library building is a great building but it cannot be expanded, there is not any handicap access and the City is growing. It is hard to pay for Park School and other locations when they can all be under the same roof. Utilities at any City building cost thousands of dollars per year. I have talked with Cheryl as she is the Council member over the Library. I want to discuss this transition with Lora and the Library Board. I want to start the conversation about possibly relocating the Library into Park School. I would like to possibly relocate the Library down there during fiscal year 2019. This is a topic we will discuss with the community. I know some residents won't agree with the move and that is okay.

EZEKIEL SANDERS: I think it would be good to move the Library to Park School. What about putting the Sheriff's Office in the old gas station on the corner?

MAYOR: The City would like to own that property long term but right now it is owned by someone else. We would look at moving both Chris and Marlowe's office into the reception area and principal's office at Park School. The first room to the left on the south end of the building, we would keep as an office and possibly a conference room if needed. The Council chambers would be the next two rooms going to the west. One wall would have to be removed to make this possible. Phase 1 of the project would be relocating the City office staff and making a room for the Sheriff's office. Phase 2 would include the Library. I am very open to having talks with the community about their concerns if they have any. The remodeling of the

building will take place over several budget years. I have had several requests to make the building a community center but it would take a significant amount of funding to make that a reality.

CHERYL: When does the Library need to relocate by to keep the fiber connection in place?

MAYOR: We will create a hybrid connection with the Library to start. A security camera will be added and we are going to put in a private point to point network. UEN has approved this in the short term. I cannot express how crucial fiber is for the Sheriff's office. They must have fiber to do what they do or they cannot work out of our building.

DAREK: Since we are planning for the future will the Black & White Days breakfast and those types of functions be relocated to Park School as well?

MAYOR: Yes, long term the plan is to move everything down there. I am hoping Phase 1 of the remodel project can be completed this coming winter. I think it will take two months or so to complete. I am hopeful to have the Black & White Days breakfast at Park School next year. The kitchen was upgraded not long ago. The roof was redone recently. The new addition was built in 1994. The gym is a big prize for the community to have and be able to use. The gym is also the oldest part of the building. There are many exciting options to consider. In regards to what fiber does for speed. Most connections have a 30 to 50 Meg download and 10 Meg upload. Fiber at the school has a 1,000 Meg download and upload. Right now we pay around \$300 per month for our city connection which is a little faster than average. With UEN the cost for fiber is around \$260 per month because of the agreement they have with the Library.

CHERYL: Does the \$260 cover everything we need?

MAYOR: Yes. We can split up the use as well. We can install routers that will allocate "x" amount of use to certain areas. The normal price for a fiber connection is \$1,800 per month after the installation is completed. Installation costs are normally around \$10,000 to \$30,000 per connection.

JUSTIN: Just as a reminder we have rescheduled the June council meeting from the 20th to the 27th.

A motion to adjourn and pay bills was made by Cheryl, seconded by Lyle and the vote was unanimous.
