

RICHMOND CITY COUNCIL

April 16, 2013

The regular meeting of the Richmond City Council was held at the Richmond City Office Building located at 6 West Main, Richmond, Utah on Tuesday, April 16, 2013. The meeting began at 7:00 P.M., Mayor Michael Hall was in the chair. The opening remarks were made by Jeff Young.

The following Council members were in attendance: Brad Jensen, Paul Erickson, Terrie Wierenga, Jeff Young and Tucker Thatcher.

A motion to approve the March 19, 2013 City Council meeting minutes was made by Terrie, seconded by Jeff and the vote was unanimous.

DEPUTY REPORT

DEPUTY BRANDON DOUGLASS: I need to get the date and time for the Black & White Days festivities. I need to report the information to Sergeant Astle.

PAUL: The parade is on Saturday at 5:00 P.M.

TERRIE: Typically, we have the traffic blocked off on State Street heading south during the parade time. Do you want me to email you the parade route?

DEPUTY DOUGLASS: Yes. What about during the week?

TERRIE: We like to have the officers police the grounds during the week.

JEFF: The movie will be on the night of the 17th. Please stop by and get a hamburger or hotdog. It would be nice to have a presence during the movie. Thursday night is the cow sale which is the 16th. Traditionally, we want to keep their celebrating in the Black & White Days area. The sale starts at 7:00 P.M. and usually ends between 8:00 and 9:00 P.M. Patrolling during that evening would be appreciated.

DEPUTY DOUGLASS: I will let Sergeant Astle know that the parade route will be emailed to him.

TERRIE: I will email it to him tomorrow.

DEPUTY DOUGLASS: I am substituting this evening for Deputy Hatch and Deputy Youngberg. Deputy Youngberg's wife is hospitalized with some pregnancy issues so he is spending quite a bit of time at the hospital. Hopefully, he will be able to attend the Council meeting within a couple of months. Do you have any other issues that need to be passed along? I will notify the department about Black & White Days.

MAYOR: Thank you for attending this evening. We appreciate your service.

MARLOWE: Deputy Douglass served in the community in years past, so he is not a stranger.

FIRE & EMT QUARTERLY REPORTS

CHIEF LYLE BAIR: The first quarter was kind of slow which was good for the community. There were 17 total calls and 7 of those were medical related. The others were some fire related or paged call outs. Nothing too drastic. There were a few structures that the Fire Department assisted on. I would like to give you some statistics of how fast we get out the door when a call

is made. From notification to on route, 60% of the time is within 2-3 minutes. From being on route to the scene, 86% of the time is within five minutes. The exception to that would be when we are called out of town. The average time per call on scene is 11-20 minutes. The fastest route time was two minutes forty-six seconds and the longest was five minutes fifty-seven seconds.

MAYOR: That is incredible.

CHIEF BAIR: The fastest time from leaving the station to being on scene was one minute nineteen seconds. We are on scene within three to eight minutes from when the call is made, most of the time.

TUCKER: Does the County give you this information?

CHIEF BAIR: Some of it comes from our self-reporting and the rest with the assistance of some of the numbers from Central Dispatch. The numbers might be a bit skewed as there is no way of knowing how fast the Dispatcher is entering into the computer when we are actually dispatched. There are still some members that are in training classes.

MAYOR: The burn season is under way. With the new laws what is being seen? What is your opinion of the new laws?

CHIEF BAIR: There have been a few burns. Chief Hammer called in one fire that was left unattended. I am not sure if that person had a burn permit or not. I have not seen much black smoke or heavy smoke yet. I have had a few calls requesting burn permits and I have to explain to them where to go on-line to make the request. Some of them are fine doing it and others have a hard time with it. I know that Ben (Lundgreen) has had some of the same issues with people calling him and he sends them to the State of Utah system as well. I am going to get with the Library personnel and explain how the system works so if people that don't have computers at home want to come in and file for a permit they can do it. We did respond to a fire in Lewiston where a barn was burning. One of the issues we have is people burning items that are not allowed to be burned.

MAYOR: Thank you for your service and the service of the Department.

CITIZEN INPUT REGARDING THE CACHE MOSQUITO ABATEMENT DISTRICT

MAYOR: Monte and Karen Frandsen are here this evening to share some information.

MONTE FRANSEN: What we want to do is relate some of our experiences and provide some information on the local mosquito fogging program. We want to raise awareness and let you know how this program affects the community. I have provided you a letter signed by over forty physicians. Mosquito season is upon us and now is the time when the fogging occurs. It is a very dangerous practice. Fogging is done as a way to control the West Nile Virus. Fogging is a poor way to do it. Some studies and news reports show that statistically there is not a lot of difference of the amount of mosquitos in areas that are fogged versus areas that are not fogged. I know that some studies have been manipulated to show the results that the people wanted and were not based on fact. This program affects our health. In the reports I have provided you there is lots of information. There are a lot of side effects from pesticides even in low levels. Chemical Sensitivity Syndrome is in about 6-15% of people and could be in as many as 10-15%. It causes fatigue, nausea, headaches and other symptoms that we are not immune too. There are a lot of people in town that are suffering. There are effects on our children and unborn children. There are many problems that come from this program. There is an increased rate of cancer and

the list goes on and on. We need to weigh the risk versus the benefit. There is a very low risk of the West Nile Virus, only one case was reported in Box Elder County recently.

TERRIE: There were actually two reported cases.

MONTE: Some of the numbers from New York show almost 2,000 people are sick from pesticide. Birds are actually dying from pesticide, not West Nile Virus as first thought. Anyone of us will call the Mosquito Abatement District and be told it is perfectly safe. The next argument that will be made is that the chemicals are registered with the E.P.A. This means nothing. There are over 80,000 registered chemicals and over 11,000 registered in Utah. Low dosages will collect in our tissues and have health effects. The effects are not immediate but delayed. Cancer might occur ten years down the road. Physicians are having a hard time diagnosing it that far down the road. Malathion is the chemical that has been used in the past and when stored at elevated temperatures it becomes more toxic. The components become stronger with more heat. The chemical can penetrate into your house, collect in your walls and on your carpet as well as in the vegetables in your garden. This year the chemical is being switched to Kontrol (Kontrol 30-30). The mosquitos have become resistant to Malathion. There is even less information available about this new chemical. It is hard for me as an individual to go into the abatement district and make a change. We have asked in the past not to spray by our house. The District has absolute authority on your land and you cannot restrict them entering your property per state law. As a City we need to be aware. The risk from West Nile Virus is very small. West Nile Virus is quite benign when compared to the effects of these chemicals. Larvicide control is much more effective. It is hard to condense all of this material into just a few minutes. I encourage the City Council to make people aware. I want the fogging of our town to be stopped. There is no benefit from doing it when comparing it to the risks.

JEFF: Were you invited down to the State of Utah meetings to speak?

MONTE: A Senator asked us to come down and speak regarding pesticide use. It was a closed committee meeting and we are not allowed to discuss it.

PAUL: There is a lot of information to consider.

MONTE: We have more information if you want to see it. There is information directly from doctors in the State of Utah.

JEFF: There is pesticide in your home or this is something that was discovered as an after effect?

MONTE: This is information that we have found out. We have met many families and some people's health has been completely destroyed. One person had a severe reaction and is now in a wheelchair. It is a State run agency so people have no recourse. There is a lot of money going into the mosquito districts through grants. They will tell you a completely different story than I am telling you. If you look for direct information you will find quite a different story than you are being told.

KAREN FRANDSEN: I have a whole packet of letters from citizens, lots had headaches after the spraying. Everyone we visited with said you should talk to so and so as they are having problems as well. I don't know how it can be healthy. I shut my windows and turn off the window cooler when I hear the truck coming. I was as naïve as anyone else until I started investigating. I don't see it beneficial anymore. There are complaints in west Smithfield as well. There were enough complaints that they only sprayed there two or three times last summer.

TERRIE: I need to disclose that I am a part-time employee of the District. We do have policies in place and a plan is filed with the County and State. Eighty-five percent of what we deal with is larvicide. We only spray when a certain amount of West Nile Virus carrying mosquitos are caught.

KAREN: They don't honor the request not to spray.

TERRIE: All of our fogging pumps have GIS capabilities and the drivers know where and when to shut them off. The noise will still be there whether there is pumping or not. The motor continues to run even when chemical is not being sprayed.

MONTE: The spray drifts.

TERRIE: Check out the website, it describes what we use.

MONTE: The deadlines for submitting claims was yesterday.

TERRIE: No, that is not correct.

MONTE: I am not here to debate. I am just letting you know what we are finding about the health of our community. Even in low amounts it can still be dangerous.

TERRIE: I have been in toxicology for 35 years.

MONTE: It is affecting the people in our community.

JEFF: The information you have presented tonight, do you have it available electronically? If so, please email to Marlowe and he will forward to all of us.

MONTE: I can provide any information that you want.

JEFF: I would like to see the resident letters you have.

KAREN: Some people don't want the spraying.

TERRIE: We have honored those requests since the District started in 2005.

KAREN: That is not what I have been told. One person I talked to was bitterly sick.

TERRIE: If they don't let us know we will continue to flog that area.

MONTE: Mosquitos that are carriers only range a couple of miles from where they are larvae. Letting people know to watch for standing water would help. Getting rid of standing water in the City would help to control the population.

BRAD: I know on 400 West, where I live, that I have seen kids outside playing and seen the fogging truck turn off the sprayer without a request even being made. If kids are outside they shut it down from what I have seen.

MONTE: I have had several complaints.

MAYOR: I think some people are confused about the motor running and when actual spraying is occurring.

CITIZEN REQUEST FOR A BLOCK CARNIVAL PARTY

DAVE GORDON: I own a carnival and have been doing carnivals for about fifteen years. I own eight attractions, five are hard rides and three are inflatables. I have been trying for a long time to get into Richmond City. I know that the event caters to the cattle. They take most of the space and I don't have any room. Last month I was here before the Council regarding my residence and I have found out that financing it where it is located in a commercial zone is going to be hard. My in-laws have given me a less number to purchase the property with this information but it is a better number than before. My desire is to have a "Save our Home" block party during the Black & White Days festivities. We would like to do it right behind (east) of this building on State Street. We would sell tickets to ride the rides. I have a site plan for you to

review. My idea is to use from the sidewalk on State and Main north to the Cardon's house about half way up the street. We would block off the street entirely except for allowing the residents into their homes. This would affect the Cardon's, Cottle's, and Merritt's. We would allow for safety vehicle access on the west side of the road that would be the home access as well. I have talked with the residents on the west side of the road and they have no issues with this proposal. We would approach within about fifteen feet of the Cardon's. We would want to block off the block because of the kids. We would like to set up on Tuesday the 14th, and Wednesday the 15th. Then have a light show on the evening of the 15th to open things up and turn on all the lights. We would advertise with some posters and presale some tickets. We would not plan on much business on Wednesday night but would be open full time on Thursday, Friday and Saturday. I am not sure about the City regulations on the times allowed, if you are interested in letting this happen. I know that you will ask what do the neighbors think. I have talked to the Cottle's, Cardon's and bank building owner (Gant) and they are all on board with it. The book store is very excited about it and just wants some space to advertise. I have a copy of my insurance certificate from last year for your review and it does not expire until July of this year. I have a one million dollar policy that is two million aggregate. There is not a ride safety program in Utah but there is in Colorado and that requires that my rides are inspected annually by a major organization that is certified to do so. I get the rides inspected in August of each year. The inspector is actually more of a teacher than an inspector and has given me some really good suggestions. He is good at his job and helps to keep the rides safe. This is my proposal.

PAUL: So you want to use some of the street itself?

DAVE: Yes, half of the street. The other half would be open for citizens and safety access.

TERRIE: Have you checked with the local Fire Department? Your proposal for the lane width is not wide enough, I think.

CHIEF LYLE BAIR: Any permanent structure requires a 20 foot fire lane to allow our apparatus to get in and out. My other initial concern would be access to the closest fire hydrant.

DAVE: I won't be anywhere near the hydrant.

JEFF: I have a couple of questions. Are you going to fence the entire area in?

DAVE: Just the rides themselves. I could barricade the entire area if needed. I was going to block all of the traffic on State Street.

JEFF: I need to explain the process. I have looked and we have talked about having a carnival for several years. As you know, I am the City representative for Black & White Days. I appreciate you looking at options and trying to be creative. I personally have mixed emotions where this is happening during Black & White Days. I personally don't see how this can work with everything else that is going on at Black & White Days. This would be in its own location and everything else would be all together in another location. It would split the festival and we have never allowed that before. If it was on private property then you could do what you wanted. Traditionally, we have not allowed access to anywhere but the Black & White Days area and the Lion's Club oversees that. They help to decide what can be located within designated areas. I have had lots of requests in the past to shut off Main Street. Your proposal is something new to me. Those are my thoughts.

DAVE: Bear with me, I understand your concern. This is not the first one (carnival) that I have done, about 25% are about like this one. Many times the event cannot support my size. I don't take away from your event because I don't sell food or toys. I just don't have those things to offer. The reason to come to the event is not because of me but I am here to help enhance the

event. The rides are for the kids. Everyone still has to eat and do all those other things so I don't see why they wouldn't still go down there to the normal areas.

TERRIE: Part of the other issue is the Lion's Club has the insurance coverage for this event and this is their major fundraiser for the year. They get a percentage of the receipts from the booths. This is pretty close to Black & White Days to just be bringing this to us now. The Lion's Club and Black & White Days Committee are looking at ways to add more booth space and have a carnival in the future. We especially want something for the 100 year celebration.

DAVE: I will gladly give a percentage to the Lion's Club. My issue has always just been the space needed.

JEFF: Did you look at the corner (100 South 100 West) by the school?

DAVE: No, in the past you were worried about that area since that is where the horse trailers are parked.

JEFF: I have talked with the Lion's Club and that is a good location and a good spot for a bigger event. One of our concerns is that once we open up that area it becomes City sponsored and we then are looked at as a co-sponsor of what you are doing. I don't know if the City wants to go that way. If we do this for you then it is going to be hard to deny others in the future. I have had other similar requests like this in the past but this is the largest. This is the first time it has come before the Council but I have met with others in various meetings before and denied their idea. I am not against your request but I think there are better times than at Black & White Days. Black & White needs to be a protected event. I am open to options. I still hold to the fact that the corner would work. Lots of people in town are hesitant for a carnival and I have had many people tell me their concerns. We have discussed giving someone a chance to see if it will work.

DAVE: Carnivals have a bad name, I know this.

PAUL: Can you use that corner?

DAVE: I would love it!

JEFF: We discussed this same topic last year about three weeks before the event as well. It is a hard decision right now when others are making plans months in advance. I like the idea of something a little bigger.

BRAD: Is the Black & White Days date the best time or would another date work?

DAVE: We could make a secondary choice but our very best choice is during Black & White Days. We want to keep our house. Only in the last month have we become aware of needing to save our house. Normally, I spend about \$2,000 travelling to an event and I would not have that expense here.

BRAD: Black & White Days has had a carnival in the past when I was a kid. I loved it and my parents hated it. As a parent I might not like it either. We have that venue that is unused most of the time but I can understand why you want to do it during Black & White Days. Blocking the road to the east of this building will not work in my opinion. We are constantly in and out of this building in preparation for the breakfast on Saturday morning. Does the Cow-A-Bunga race go down that road?

TERRIE: I am also worried about a loss of parking.

BRAD: How much space do you need?

DAVE: The smallest area that I need is 150 feet by 150 feet and biggest would be 300 feet by 300 feet.

BRAD: Where are we going to put the horse trailers?

JEFF: I would need to work to free up that corner. None of the other shows allow parking on-site. (Craig) Harris has an area he mentioned in the past. Something like this proposed event just does not happen quickly there are so many moving parts. I do like the idea of something. It is going to be hard to make it work this year. The Park is pretty much empty the rest of the year.

DAVE: We need to be in conjunction with another event to be successful.

JEFF: I appreciate your dedication and respect that you are trying to make money. I respect out-of-the-box thinkers. I need to think more about this. I just don't know right now.

MAYOR: Time-wise this is a concern. He (Dave) would need to do all the labor for his project.

JEFF: I would need to check and see what rides are already approved so there is not any competition. I know that Rebound Unlimited has made a contract and will have air rides this year.

PAUL: Will it work only having hard rides?

DAVE: Yes, my money is in the hard rides.

JEFF: Noise is a concern.

DAVE: I use quiet generators and they are quiet enough we can speak with a normal tone of voice. The rides are noisier than the generators. The Roller Coaster is the loudest of the rides.

JEFF: I am okay looking into it but I would need to meet with the Lion's Club and Black & White Committee to discuss. I am okay to try something new. I would prefer to try with someone local like yourself. It is harder to work with someone outside the community that does not have a vested interest.

TERRIE: I don't like the State Street idea.

PAUL: On the corner location, I would like to see access restricted to only one or two ways to get in. I want it to be a defined area. I don't want kids running in and out. We cannot have kids on the street either.

JEFF: The animals are a big issue.

MAYOR: We would expect the same time restrictions as the others. The carnival would need to be shut down when the horse pulls are going on. I am not opposed to giving it a shot. I think the Council will consider it on the corner. The State Street idea we are opposed too. Let's have Jeff get with the Lion's Club and Black & White Days Committee.

TERRIE: I know that the Lion's Club supplies the insurance for the entire event.

PAUL: The agreement is that the Lion's Club manages the celebration and the rent received goes to the Lion's Club. They are acting as an agent of the City and there is a long term relationship between the City and the Lion's Club in this regard.

DAVE: I am not trying to circumvent the Lion's Club in any way.

TUCKER: So you want to do it for a hand-full of days?

DAVE: Wednesday night through Saturday night.

MAYOR: It will need to be shut down before the horse pulls start on Saturday evening.

TUCKER: What is the timing on the other nights?

JEFF: We have really promoted the horse pulls heavy this year and there are around 21 teams rather than the normal 12 or so. I have to meet with the Committee, it is a concern and I need to discuss with them.

DAVE: I have done a carnival 1,000 times at fairs, horse shows, horse pulls, etc. and I have never been an issue, in fact most places ask me to come. I have never had one cowboy complain

about what I am doing or the noise. I have never had any animal or people problems. I can promise that I have never had a problem in the past.

JEFF: I am okay looking into it but I will have to find a place to put 50 horse trailers.

TED COLLINS: I like entrepreneurs. I have lived here for the last five years and come to the horse pulls for the last ten years. It is one of the most original shows out there. One thing that has not been mentioned is that the ten to seventeen year old demographic is being lost. My kids have complained about the rides the last couple of years and want something new and exciting.

TERRIE: Do you need a flat surface or would the slope at the City park work?

DAVE: Two of the rides need to be on a flat surface the rest don't.

JEFF: I like the idea of the corner, it coordinates with all the other events. Families can all be in the same area. I agree with what Ted had to say, that is a very valid point. Our teenage demographic attending is very low.

DAVE: The rides are for kids, teens and even adults. I offer all day ride passes and some people will just keep riding.

TERRIE: I get the sense that this is something that we will consider but it is a very short time frame to make it happen. After Jeff meets with the Lion's Club and the Black & White Days Committee we will see if there is something that we can work out. Let's see how it goes. We need to double check your insurance.

DAVE: I have a different type of insurance than the people with booths have. Normally, I have to cover everything for the entire event.

MAYOR: We need to be careful of the times that it is open where it is in a residential area. It needs to be shut down by 10:00 P.M. and cannot be open when school is in session.

DAVE: I was thinking from about 4:30-5:00 P.M. to open and closing between 8:30-9:00 P.M.

PAUL: Will there be someone there during school time to monitor the equipment?

DAVE: I have 24-hour security so nothing is damaged or vandalized.

MAYOR: I am not opposed to considering this idea. Jeff needs to get with Black & White Days committee before anything else can happen.

JEFF: The horse trailers are an issue.

MAYOR: Parking outside of the event is an issue.

JEFF: Maybe there is another City property we could utilize for the trailers.

MAYOR: Let's talk with the Black & White Committee. After Jeff meets with the Lion's Club and Black & White Days Committee he will contact you and then you can decide if you want to proceed.

TERRIE: The Highland Games are held here in August at the City park.

DAVE: That is a great idea but August is a really busy month for me. May is a month I have a hard time filling up.

JEFF: I have a lot of calling and checking to do. I will do it as quick as possible. Technically this will require working with the Lion's Club as well. This is much bigger than just monitoring booths.

TERRIE: This is definitely something we want in 2015 for the 100 year celebration.

DAVE: Just give me a chance. I live here and we want to stay here permanently.

MAYOR: Jeff will be in touch.

FINANCIAL REPORT

JUSTIN: Good news, we received the \$146,737 reimbursement on the North Cache road grant. That was a great project and something that would never had been done if not completed through another funding source. That will show up on the April financials. There were \$14,668 in Class C Road Funds collected in March. Paul, please make sure we are getting all of the road projects scheduled to make sure these funds are spent by the end of the budget year. The Library received a State of Utah grant in the amount of \$4,357.

TERRIE: The grant is for collection development and we will be purchasing a couple of new computers.

JEFF: Please make sure that we get the Outlook software for those new machines.

JUSTIN: There was a \$100 donation to the Fire Department and a \$100 donation to the EMT Department. Thanks to Boyd Lewis for the donation. He believes in this invaluable service and has donated for the last couple of years. I contacted A & D Landscaping and they are paying \$250 to sponsor the Cow-A-Bunga race this year. Those funds were received in April and will be used to give to the race entrants something when they finish the race. Justin Gilbert's wage is included in the building department for the winter and will be switched back over to parks starting this month. We received \$1,410.51 in interest on the remaining water fund loan balance. There was a water impact fee that was collected a couple of months back and I would like to use that and make a payment on the loan from the capital projects fund to the water enterprise fund. The interest due for January through April on the loan is \$1,339.48. The amount of principal that would be paid is \$3,061.52 making a total payment of \$4,401.00.

A motion to approve the transfer of \$4,401.00 from the Water Enterprise Fund Impact Fee Cash account to the Capital Projects Fund Cash account consisting of \$1,339.48 in interest and \$3,061.52 in principal was made by Paul, seconded by Terrie and the vote was unanimous.

JUSTIN: The current principal balance on that loan is \$133,947.18 so it will not be reduced to \$130,885.66 after I complete the transaction. There is \$2,895,291 in remaining funds on the CIB loan and this will start to diminish again as ABC is back to work on the water project. I have visited with Jeff and the Mayor regarding hiring a part-time person for the cemetery and this person will not be allowed to work more than 20 hours per week. I would expect someone to be hired within the next month. In regards to the new budget, we are going to reopen and adjust the current budget next month and then in June there will be a public hearing for the current budget and the new budget. I have included the small request made by the library. The only other additions are for a new furnace a/c unit on the other side of this building and for a material storage area that we will build down at the maintenance shop. There is not any room at this point to include any other items.

COUNCIL MEMBER REPORTS

BRAD: You heard the Fire Department report earlier and I don't have anything else to add. Darek will be meeting with ABC, Inc. on the tank project as a spring kick off type meeting. The backfilling is about half way done and there is only one more building that needs to be built. There will be a few line connections that need to be completed. Right now we are going through

the proper State of Utah procedures on bidding the work at the MBR plant. There are no new nuisance complaints.

PAUL: I have had four or five questions regarding the ski resort, does anyone have an update?

MAYOR: I was informed that the citizen group has dropped their legal appeal. The ski resort is now free to move forward but have several conditions that will need to be met. There are several conditions as part of their Conditional Use Permit and they will need to finish up with their financing from what I have been told.

JEFF: The hamburger stand is going to be painted by our workforce.

MAYOR: Once our guys are done there will be a stencil done as well.

SCOTT BALL: Do we need to worry about the mural?

JEFF: No. In regards to the American Legion, the Mayor and myself met with them. An agreement has been reached where the members of that organization are getting older and having a hard time managing it (the hamburger stand) during Black & White Days. We worked out a deal to help them with some budgetary items like Girls State and the Veteran's dinner they help out with. The Fire Department will be manning the stand this year. I am open to what happens in there or who utilizes it in the future. It was a very bittersweet meeting but ultimately we all had the same goal. The American Legion will continue to be represented. I am for letting rotating groups utilize that building on a yearly basis. The stencil or mural work on the building will be the American flag and the words "American Legion". Everyone knows that building as the "American Legion Hamburger Stand". The current members are not going to be involved as much in the physical work of operating the stand but will be outside meeting people and passing along information. This brings me to another point, the grills in the stand are not owned by the City. They are borrowed from residents who could say anytime that we cannot use them anymore. I would like to get some new City grills in there so that we own everything in the building. Right now we own the appliances and everything else and I think it makes logical sense for us to own the grills as well.

TERRIE: I think it is something that we need to do. We should check with the businesses that are relocating from the area where Al's Sporting Goods is building their new building and see if any of them are selling their grills.

MAYOR: The grills will have to be able to fit through the front window. Currently, we are using propane grills in there.

JEFF: It would be nice to have the new grills in there for the Fire Department to utilize this year. I am still trying to figure out who owns the grills, they are all very old.

LYLE: I know that one of the grills works great.

JEFF: We need to get new ones on our own. We also need to send a letter of appreciation to those that let us use their grills all these years. This is something that I want to do within the next couple of weeks.

TUCKER: I purchased a couple last year and have some ideas of where you can purchase them from.

JEFF: Is propane the best option? Only option?

LYLE: There is not any natural gas there but it would be nice to plumb a line outside of the building and bring in one large tank for Black & White Days.

JEFF: I have inspected the breakfast grills and they look great. Thanks to our guys for restoring them. Brad, how is the breakfast coming together?

BRAD: Darek is on board with helping and things will work like in the past.

TERRIE: Have we ever considered raising the costs?

JUSTIN: We have always offered this more as a service to the community than as a money maker or even an event to break even.

CHRIS: I would like someone else to collect the money this year, I have done it for several years and would like to help with other things.

JEFF: Not a problem, I will get someone else. The movie night at the park will show the movie “Wreck it Ralph” and the Youth Council will oversee it.

TERRIE: I will get the necessary food permits.

JEFF: I am hoping the Council can help with the food at the movie, mainly cooking hamburgers.

PAUL: The City wide cleanup will be on May 4th starting at 10:00 A.M. with everyone gathering in front of the Black & White Days building.

JEFF: The Youth Council will be there at 9:30 to get instructions. There will also be two Youth Council members here to help with the breakfast for the entire time.

BRAD: Did you get us the cooler trailer for the milk?

JEFF: Yes. The wireless upgrades to the City buildings are finally completed and all of the system went live today. Century Link will still be live for one more week while we make sure everything works properly. After all is good there we will look at changing over the phone lines down the road in two to four weeks. I know that Scott is nervous about the transition at the MBR plant but we won’t make the switch until he is comfortable with it. Internet is finally available in the Maintenance shop after a very long time.

PAUL: The City wide cleanup will be for residents to help clean up garbage and debris in assigned City areas to help spruce up the town before Black & White Days. People will show up at 10:00 A.M. and get their assigned area. When they have completed their task we will give them a meal ticket and they can come down to the park and get a free lunch for their help. It will be hamburgers, hotdogs, chips and drinks like last year.

JEFF: Is it okay for local church wards to clean up in their existing ward boundaries?

PAUL: That is fine, just have them let me know what they are doing and where they are doing it at. The real purpose is to help clean up the City areas not private property but we won’t stop those projects either.

JEFF: I suggested to those members of my area to clean up the City right of ways.

TUCKER: I don’t have any new news from the Planning & Zoning Commission.

MAYOR: You have a copy in your packet of the approved minutes from last month’s meeting and the draft minutes of this month’s meeting.

MAYOR’S REPORT

MAYOR: All of what I was going to speak on has been covered in other areas of this meeting. The next Council meeting will be on May 21st.

A motion to pay the following bills was made by Brad, seconded by Tucker, and the vote was unanimous.
